FINAL REPORT

Contract No. N6ori-201, T.O.1

PREPARED UNDER
CONTRACT No. N6ori-201, T.O.1
WITH THE OFFICE OF NAVAL RESEARCH
UNITED STATES NAVY

REPRODUCTION IN WHOLE OR IN PART
IS PERMITTED FOR ANY PURPOSE
OF THE UNITED STATES GOVERNMENT.

IMM-257
c.1

BIBLIOGRAPHY
of
Work Done Under Contract N6ori-201, T.O. 1

IMM-NYU Reports

- 155 Problem of temperature measurement. E. Isaacson.
9/27/46.
- 156 Diary of trip to California. H. Grad. 3/47.
- 157 Cavity theory of the Wapus. B. Friedman. 5/13/47.
- 158 Formation and decay of shock waves. K. O. Friedrichs.
- 158a The formation of breakers and bores. The theory of non-linear wave propagation in shallow water and open channels
J. J. Stoker. 6/47.
- 159 Waves against a 135° dock.
- 160 Report on a trip to California. J. J. Stoker. 6/47.
- 161 Waves over beaches of small slope, under a dock, and past plane barriers. J. J. Stoker. 8/47.
- 162 Waves against a 135° overhanging cliff. E. Isaacson.
9/47.
- 163 Waves in the presence of an inclined barrier. F. John.
11/47.
- 164 Mathematical determination of transient temperatures in solids. 8/47.
- 165 On the non-occurrence of a limiting line in transonic flow
K. O. Friedrichs. 9/47.
- 166 Theory of underwater explosion bubbles. B. Friedman.
9/47.
- 167 Decaying shocks. A. Lax. 10/47.
- 168 Water waves on a shallow sloping beach. K. O. Friedrichs.
10/47.
- 169 The dock problem. K. O. Friedrichs, H. Lewy. 10/47.
- 170 Report on impressions of scientific work in Göttingen and Hamburg, Germany. 7/47.
- 171 The solitary wave and periodic wave in shallow water. J. B. Keller.
- 172 Report on trip to California. M. Heineman. 4/8-28/47.
- 173 Trip to California, Ann Arbor and Pittsburgh. J. J. Stoker. 5/31-6/18/49.
- 175 A Note on the Application of Schwinger's Variational Principle to Dirac's Equation of the Electron. H. Moses. 6/5

- 176 On the free energy of a mixture of ions: An extension of Kramer's theory. E. W. Montroll and T. H. Berlin. 9/27/51.
- 177 Diary of Trip to Europe. J. J. Stoker. 8/1-9/24/51.
- 179 Electrons and Positrons in a Time-Dependent electromagnetic field: A solution in the Schrödinger picture. H. E. Moses. March, 1952.
- 181 Explosion of Cylindrical charge in water between two rigid walls. 1946.
- 195 Dynamical theory for treating the motion of cold and warm fronts in the atmosphere. J. J. Stoker. Dynamics of meteorological fronts. G. B. Whitham. June, 1953.
- 196 Report on travel in Europe, Summer 1952. F. John. 5/29/53.
- 206 Methods for matrix inversion and for the solution of simultaneous linear algebraic equations. J. H. Curtiss. Technical Report No. 1. Preface and Summary of the Text. March, 1954. (This report divided between two contracts)
- 207 Lectures on the theory of industrial sampling. J. H. Curtiss. Technical Report No. 2. Preface and Summary of the text. March, 1954. (This report divided between two contracts)
- 208 On systems of ordinary, non-linear differential equations involving periodic given functions with a small period. Joel Franklin. April, 1954.
Progress Report on Activities and Work Done Under Contracts N6ori-201, Task Order 1, Nonr-285(01), Nonr-285(02 Nonr-285(06), DA-30-069-ORD-835. March 5, 1953.
- 216 Lectures on the theory of industrial sampling. J. H. Curtiss. Technical Report No. 4. April, 1955. (This report divided between two contracts)
- 217 On the convergence of an approximation method of M. J. Lighthill. Wolfgang Wasow. May, 1955.
- 220 Matrix inversion and the solution of linear equations. J. H. Curtiss. Technical Report No. 5. August, 1955. (This report divided between two contracts)
- 226 On the theory of large-scale nearly-horizontal motions in the atmosphere. George K. Morikawa. February, 1956.
- 245 A complex frobenius theorem. L. Nirenberg. January, 1958.

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the transparency and accountability of the organization. The text also mentions the need for regular audits to ensure that the records are up-to-date and correct.

In the second part, the document outlines the procedures for handling financial data. It describes the steps involved in collecting, processing, and analyzing financial information. The text also discusses the importance of using reliable sources of data and the need for consistent reporting standards.

The third part of the document focuses on the role of the accounting department. It describes the various functions of the department, including bookkeeping, financial reporting, and tax compliance. The text also discusses the importance of the accounting department in providing accurate and timely financial information to management.

In the fourth part, the document discusses the importance of internal controls. It describes the various types of internal controls, such as segregation of duties, authorization, and reconciliation. The text also discusses the importance of monitoring and evaluating the effectiveness of internal controls.

The fifth part of the document discusses the importance of financial reporting. It describes the various types of financial reports, such as the balance sheet, income statement, and cash flow statement. The text also discusses the importance of providing accurate and timely financial information to stakeholders.

In the sixth part, the document discusses the importance of budgeting. It describes the various steps involved in the budgeting process, including setting goals, identifying resources, and allocating funds. The text also discusses the importance of monitoring and evaluating the performance of the organization against the budget.

The seventh part of the document discusses the importance of financial management. It describes the various functions of financial management, including capital budgeting, working capital management, and risk management. The text also discusses the importance of making informed financial decisions to ensure the long-term success of the organization.

In the eighth part, the document discusses the importance of financial planning. It describes the various steps involved in the financial planning process, including setting financial goals, identifying risks, and developing strategies. The text also discusses the importance of monitoring and evaluating the progress of the financial plan.

Papers Printed in Communications on Pure and Applied Mathematics

- The Formation of Breakers and Bores. The Theory of Nonlinear Wave Propagation in Shallow Water and Open Channels. J. J. Stoker. Vol. 1, No. 1, January, 1948. pp. 1-80.
- Appendix. On the Derivation of the Shallow Water Theory. K. O. Friedrichs. Vol. 1, No. 1, January, 1948. pp. 81-87.
- On Free Boundaries of an Ideal Fluid. The Principle of Analytic Continuation. I. Max Shiffman. Vol. 1, No. 1, January, 1948. p. 89.
- Waves over Beaches of Small Slope, Under a Dock, Under an Overhanging Cliff, and Past Plane Barriers. Introductory Paper. J. J. Stoker. Vol. 1, No. 2, May, 1948. p. 101.
- Water Waves on a Shallow Sloping Beach. K. O. Friedrichs. Vol. 1, No. 2, May, 1948. p. 109.
- The Dock Problem. K. O. Friedrichs and Hans Lewy. Vol. 1, No. 2, May, 1948. p. 135.
- Appendix. Refined Asymptotic Expressions for the Complex Potentials of the Dock Problem. Vol. 1, No. 2, May, 1948, p. 143.
- Waves in the Presence of an Inclined Barrier. Fritz John. Vol. 1, No. 2, May, 1948. p. 149.
- Waves against an Overhanging Cliff. Eugene Isaacson. Vol. 1, No. 2, May, 1948. p. 201.
- Formation and Decay of Shock Waves. K. O. Friedrichs. Vol. 1, No. 3, September, 1948. p. 211.
- Decaying Shocks. Anneli Lax. Vol. 1, No. 3, September, 1948. p. 247.
- On the Solution of the Boltzmann Equation for Rarefied Gases. Joseph B. Keller. Vol. 1, No. 3, September, 1948. p. 275.
- On the Non-Occurrence of a Limiting Line in Transonic Flow. K. O. Friedrichs. Vol. 1, No. 3, September, 1948. p. 287.
- Appendix. Donald A. Flanders. Vol. 1, No. 3, September, 1948. p. 299.
- A Mathematical Example Displaying Features of Turbulence. Eberhard Hopf. Vol. 1, No. 4, December 1948. p. 303.
- The Solitary Wave and Periodic Waves in Shallow Water. Joseph B. Keller. Vol. 1, No. 4, December, 1948. p. 323.
- On Harmonic Vibrations out of Phase with the Exciting Force. Fritz John. Vol. 1, No. 4, December, 1948. p. 341.
- On the Perturbation of Continuous Spectra. K. O. Friedrichs. Vol. 1, No. 4, December, 1948. p. 361.
- On Free Boundaries of an Ideal Fluid. II. Max Shiffman. Vol. 2, No. 1, March, 1949. P. 1.
- On the Motion of Floating Bodies. I. Fritz John. Vol. 2, No. 1, March, 1949. p. 13.

- A Simple Urn Model. Bernard Friedman. Vol. 2, No. 1, March, 1949. p. 71.
- Note on Straight Pipe Jet Motors. Harold Grad. Vol. 2, No. 1, March, 1949, p. 71.
- Resonance Burning in Rocket Motors. Harold Grad. Vol. 2, No. 1, March, 1949. p. 79.
- Shock Waves in Arbitrary Fluids. Hermann, Weyl. Vol. 2, No. 2, 3, June-September, 1949. p. 123.
- A New Treatment of the Ship Wave Problem. A. S. Peters. Vol. 2, No. 2,3, June-September, 1949. p. 123.
- Mathematical Solution of the Problem of Roll-Waves in Inclined Open Channels. Robert F. Dressler. Vol. 2, no. 2,3, June-September, 1949. p. 149.
- Note on Approximating Complex Zeros of a Polynomial. Bernard Friedman. Vol. 2, No. 2,3, June-September, 1949. p. 195.
- On Linear Partial Differential Equations with Analytic Coefficients: Unique Continuation of Data. Fritz John. Vol. 2, No. 2,3, June-September, 1949. p. 209.
- On Nonlinear Partial Differential Equations with Two Independent Variables. Richard Courant and Peter Lax. Vol. 2, No. 2,3, June-September, 1949. p. 255.
- The Propagation of Waves in Shallow Water. Sherman Cabot Lowell. Vol. 2, No. 2,3, June-September, 1949. p. 275.
- Some Assertions Equivalent to the Prime Number Theorem for Arithmetic Progressions. Harold N. Shapiro. Vol. 2, No. 2,3, June-September, 1949. p. 293.
- An Elementary Proof of the Prime Ideal Theorem. Harold N. Shapiro. Vol. 2, No. 4, December, 1949. p. 309.
- Note on N-Dimensional Hermite Polynomials. Harold Grad. Vol. 2, No. 4, December, 1949. p. 325.
- On the Kinetic Theory of Rarefied Gases. Harold Grad. Vol. 2, No. 4, December, 1949. p. 331.
- Water Waves over a Sloping Bottom. E. Isaacson. Vol. 3, No. 1, March, 1950. p. 11.
- Time-Dependent Linearized Supersonic Flow Past Planar Wings. C. Gardner. Vol. 3, No. 1, March, 1950. p. 33.
- A Relation Between Time-Dependent and Steady Linearized Supersonic Flows Past Conical Bodies. C. Gardner. Vol. 3, No. 1, March, 1950. p. 39.
- On the Motion of Floating Bodies. II. Simple Harmonic Motions. Fritz John. Vol. 3, No. 1, March, 1950. p. 45.
- On the Representation of Large Integers as Sums of Primes. I. Harold N. Shapiro and Jack Warga. Vol. 3, No. 2, June, 1950. p. 153.
- Theory of Underwater Explosion Bubbles. Bernard Friedman. Vol. 3, No. 2, June, 1950. p. 177.

- On the Uniqueness Theorems for the Embedding of Convex Surfaces in Three-Dimensional Space. J. J. Stoker. Vol. 3, No. 3, September, 1950. p. 231.
- On the Iterates of a Certain Class of Arithmetic Functions. H. N. Shapiro. Vol. 3, No. 3, September, 1950. p. 259.
- Reflection of Water Waves from Floating Ice in Water of Finite Depth. Mortimer Weitz and Joseph B. Keller. Vol. 3, No. 3, September, 1950. p. 305.
- The Fundamental Solution of Linear Elliptic Differential Equations with Analytic Coefficients. Fritz John. Vol. 3, No. 3, September, 1950. p. 273.
- The Effect of a Floating Mat on Water Waves. A. S. Peters. Vol. 3, No. 4, December, 1950. p. 319.
- The Force of Impact on a Cone Striking a Water Surface (Vertical Entry). M. Shiffman and D. C. Spencer. Vol. 4, No. 4, November 1951. p. 379.
- Mathematical Aspects of the Quantum Theory of Fields. I and II. K. O. Friedrichs. Vol. 4, No. 2,3, August, 1951. p. 161.
- Mathematical Aspects of the Quantum Theory of Fields. III. K. O. Friedrichs. Vol. 5, No. 1, February, 1952. p. 1.
- Supersonic Flow Through Nozzles with Rotational Symmetry. Yu Why Chen. Vol. 5, No. 1, February, 1952. p. 57.
- Water Waves over Sloping Beaches and the Solution of a Mixed Boundary Value Problem for $\Delta^2 \phi - k^2 \phi = 0$ in a Sector. Arthur S. Peters. Vol. 5, No. 1, February, 1952. p. 87.
- Some existence Theorems for Hyperbolic Systems of Partial Differential Equations in Two Independent Variables. Avron Douglis. Vol. 5, No. 2, May, 1952. p. 119.
- On Locally Convex Manifolds. John Van Heijenoort. Vol. 5, No. 3, August, 1952. p. 223.
- On the Solution of Nonlinear Hyperbolic Differential Equations by Finite Differences. Richard Courant, Eugene Isaacson, Mina Rees. Vol. 5, No. 3, August, 1952. p. 243.
- Mathematical Aspects of the Quantum Theory of fields -- Part IV. K. O. Friedrichs. Vol. 5, No. 4, November, 1952. p. 349.
- Markoff Chains, Wiener Integrals, and Quantum Theory. Elliot W. Montroll. Vol. 5, No. 4, November, 1952. p. 415.
- Mathematical Aspects of the Quantum Theory of Fields -- Part V. K. O. Friedrichs. Vol. 6, No. 1, February 1953. p. 1.
- Resistance Effects on Hydraulic Instability. R. F. Dressler and F. V. Pohle. Vol. 6, No. 1, February, 1953. p. 93.
- On the Non-Existence of Limiting Lines in Transonic Flows. C. S. Morawetz and I. I. Kolodner. Vol. 6, No. 1, February, 1953. p. 97.
